Notes

Stores credit card data — PCI-DSS scope

Names, emails, addresses — privacy regulation scope

Public-facing storefront; processes all transactions

Tracks order fulfillment; business continuity dependency

Used for day-to-day operations and system access

Stores internal docs, contracts, and HR files

Hosts web app and databases; third-party dependency

Third-party payment processor — PCI-DSS relevant

Payroll, performance reviews, personal info

Google Workspace — phishing and BEC attack surface

Controls all inbound/outbound traffic

Nightly backups of DB and file server

Accounts with elevated access — insider threat risk

Access to order data and customer records

Marketing site — no sensitive data stored
